Experience

MegaNet|Intern – November 2023 - February 2024

- Interned at MegaNet Technologies where I actively worked in a team to build website projects forwarded to the company by clients.
- Worked as Technical support when clients had an issue

WebGrafik|Employee – March 2023 - August 2023

- Actively designed graphic designs, posters and logos
- Worked as technical support.

Projects

Jenga|Links homeowners, contractors and materials github.com/GideonMissoy/Jenga

Personal project Feb 2024 – Present

- Jenga aims to streamline the process of finding and hiring contractors for construction projects while availing access to jobs for building contractors, and facilitate easy material procurement.
- Built UI components + frontend using React js
- Designed data models and backend functionality in Django ensuring safe and efficient data handling.
- Implemented RESTful API endpoints and used a MySQL database.

Mp3Huddle|Creates huddle for listening to Music github.com/GideonMissoy/Mp3Huddle

Personal Project April 2024 – Present

- The app lets users create a room and listen to music.
- Built frontend using React.js and backend using Django while implementing authentication using JWT tokens.
- Using a Restful api and PostgreSQL database.
- Used Spotify API.
